

Clinical Excellence

"Over the past five years, Picis has enabled us to completely automate the entire perioperative suite, providing a streamlined process from surgical scheduling through surgery and anesthesia documentation to PACU. The benchmarks and quality reporting we provide using Picis total perioperative automation solution enable us to easily identify, implement and manage key changes that improve the efficiency and quality of patient care in our ORs."

– Alice Nigl, Manager of Surgery Information Systems
St. Jude Medical Center

St. Jude Medical Center Fullerton, CA
